Interests

Find bugs in different apps.

When I find bugs in apps I use in my everyday life (e.g. Kufar, Viber, VK, Onliner, WOT game) I always send bug- reports to developers. Unfortunately, it usually stays unfixed :)

Computer hardware.

In my free time I like to read and watch news about cutting-edge technologies of computers hardware (e.g. processors, graphic cards, motherboards, new OS).

I also like to assemble and upgrade PC.
